Career Objective

I am growing as a web developer by creating clean, intuitive, and purposeful applications. I enjoy working with React.js and modern web technologies, and I am beginning to explore Next.js to further develop my full-stack skills. Recently, I have been working with PostgreSQL to improve my relational database skills. My goal is to join a team where I can contribute, keep improving, and help build things that actually make a difference.

Skills

Technical Skills:

- **Frontend:** React.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, DaisyUI
- **Backend:** Node.js, Express.js
- **Database:** MongoDB (Atlas), PostgreSQL
- **Authentication & Security:** JWT, Firebase, custom authentication (login/register) systems
- **Tools & Platforms:** GitHub, VS Code, Figma, Vercel, Netlify, NVM
- **Programming Languages:** C, C++

Interpersonal Skills:

- Team collaboration and leadership
- Time management
- Adaptability and quick learning

Experience

Smart Irrigation (Client Project) **Link:** Smart Irrigation | Jan 2026 – Apr 2026
Frontend Web Developer DIU Funded Project

- Implemented multi-language support (Bangla & English) for improved accessibility
- Integrated Firebase authentication for secure user login and registration
- Collaborated with backend developers to display real-time field data (soil moisture, temperature, humidity, irrigation status)

Technologies: React.js, JavaScript, Firebase, Tailwind CSS, React Router, Framer Motion, i18next

Smart Mentoring System (SMS) (Team Project) **Link:** SMS | Mar 2025 – Ongoing
Web Developer & Team Leader DIU Project

An AI-integrated mentoring platform with real-time communication and intelligent recommendations.

- User registration & login using JWT authentication
- Real-time messaging system for mentor groups and discussions & automated email and SMS notifications
- Rules base AI-integrated heatmap-based mentor recommendation system

Technologies: React.js, Node.js, Express.js, PostgreSQL, JWT, Bcrypt, Base64, Twilio, Nodemailer

Projects

LearnHive (MERN Stack) **Live | GitHub:** LearnHive | Client | Server

A platform connecting institutions, tutors, and students with dashboards and course management tools.

- Course management system for tutors and students.
- Integration of secure payment gateways.
- Secure authentication and role-based access control.
- Admin dashboard.

Technologies: React.js, Node.js, Express.js, MongoDB, Stripe, Firebase, Cloudinary, TanStack Query

RaceTrackers (MERN Stack) **Live | GitHub:** RaceTrackers | Client | Server

A marathon event management platform for organizers and participants.

- Event participant dashboard.
- Organizers can create and customize marathon events with essential details.
- Users can track event details, manage registrations, and receive updates.

Technologies: React.js, Node.js, Express.js, MongoDB, Firebase, TanStack Query, React DatePicker, AOS

CrowdCube (MERN Stack) **Live | GitHub:** CrowdCube | Client | Server

A crowdfunding platform enabling users to create and support fundraising campaigns.

- Running Campaigns – View and track ongoing fundraising campaigns.
- Add a new campaign – Easily start a new fundraising campaign.
- My Donations – Track donations made to different campaigns.

Technologies: React.js, Node.js, Express.js, MongoDB, Firebase, Lottie React, React Simple Typewriter

Education

Daffodil International University (DIU) Jan 2022 – Dec 2025
B.Sc. in Information and Communication Engineering 3.69 Out of 4.00

Programming Hero June 2024 – January 2025
Web Development (MERN Stack)

Research Thesis

- **AI-Integrated Smart Mentoring System (SMS):**
  - Enhanced the existing DIU mentoring system using AI-based improvements
  - Reduced mentor workload by **70–80%** through AI-driven assistance
  - Decreased student dropout rate by **70–80%** using AI-based recommendations & real-time communication

Extra-Curricular Activities

- **BUET Mechosta:** I participated in the BUET Mecosta poster presentation competition with students from multiple universities.
- **Programming contest (ByteBattle):** Participated in inter-departmental programming contest.
- **Secretary of Store & Logistics:** I was in charge of store and logistics management in the Information and Communication Engineering Club.

Languages

- **Bengali:** Native or bilingual proficiency
- **English:** Limited working proficiency
